EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 34, line 7, replace "loosly" with --loosely--.

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the application is in condition for allowance. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

The following is an examiner's statement of reasons for allowance: the claims as supported by the specification differs from the prior art in that it does not teach thermocatalytic pollution control which specifically has the catalytic media rotated to form a fluidized bed and convert the varying flow rate of the target pollutant to a selected level of destruction and removal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
